

Convert 230 or 480 Volt Single Phase to 230 or 480 Volt Three Phase

The Worlds First Complete Solution for Pump and Pivot With Single Phase Input

Electro Power is proud to announce the development of a complete solution for Pivot and Pump together in a single panel.

The ComboPak offers the best of both worlds built into a single panel. A VFD to Run the Pump and a Rotary Phase Converter to power the pivot. This provides a single answer to both, that speeds installation and offers greater reliability for the Irrigation Industry. Simply bring your single phase into the panel and three phase out to the Pivot and three phase out to the Pump. It's as easy as that. No more spending hours figuring out the various phase converters and how they get wired, how they work and where you are going to mount them, it's already done.

Available in both 230V and 480V.

Regulate your pressure precisely.

Convert Single to Three Phase

Soft-Start Your System

Save Money on Your Electric Bill

Our ComboPak comes out the box programmed and ready to run and offers these controls on the door front for easy access:

- Speed Pot to Control Speed of pump in SPEED MODE and pressure in PRESSURE CONTROL MODE
- HAND/OFF / AUTO
- Viewing widow for the keypad
- Many more options available
